

50 years of excellence in Plastering Solutions

In last 50 years we became professionals in delivering high customer satisfaction, creating never ending relationships and providing most lucrative plastering solutions to our patrons. However, providing best quality plaster is not something that we learnt, it's something that we started with.

Founder of Raj Plasters Mr. D. Mohta was a member of Gypsum Building Material Sectional Committee (BDC 21). He had set up Indian Standard (IS)- 2542 (Part I/Sec 1 to 12) - 1978 i.e. 'Methods of tests for Gypsum Plaster, Concrete & Products Part I Plaster & Concrete'.

We are SME of manufacturing and creating finest quality plaster like no one else and that is the reason QUALITY is the primary and strongest USP of Raj Plasters. Raj Plasters as a trend conducts audits and quality checks for 'Rajhans Plaster' regularly so as to maintain its record of providing 100% customer satisfaction. To name a few labs which certified 'Rajhans Plaster' for its best quality are:

- Spectro Analytical Labs Pvt. Ltd., Delhi
- Italab Private Ltd., Mumbai
- Geo Chem, Mumbai
- Ceramic Electrical Research & Development Centre, Bikaner
- And many more...

Raj Plasters

WHO WE ARE

Raj Plasters is a quick response, quick turnaround, ultimate value for money plastering specialist. Our business is totally customer-focused; satisfying our clients' needs within the stipulated timelines and budget constraints is our core aim and priority.

For over 50 years, our in-depth business focus has been to provide top-of-the-line, high class building solutions. Our aim is to enable builders, developers, businesses and individuals to construct superior residential and commercial spaces.

The Raj Plasters Attitude

Our attitude is simple - no job is too big or too small. What is important to us is You, the client, your needs, your specifications and above all, your absolute satisfaction.

The Raj Plasters Value Proposition

Our value-add to our clients goes way beyond just supplying raw material. Our goal is to ensure long term relationships with our clients via our timely delivery, smooth transition, and cost-effective projects.

The Raj Plasters Vision

Our vision is to provide top-quality plaster products and services to every quality-conscious developer, builder, individual or company in every corner of India.

WHY SHOULD YOU PARTNER WITH RAJ PLASTERS?

Our long term, successful client relationships and our ability to ensure customer satisfaction are testimonials of our attitude, value proposition and industry practices. In our 50-year reign, we have achieved 100% customer satisfaction and retention, a fact that gives us immense pride.

Our success is also due to the fact that we don't sit back on our achievements and let things slide. Our loyal and faithful clients, who have been with us for more than 30 years are still our top priority. We still continue to impress them further with every engagement and execution.

OUR PRODUCTS

Rajhans Gypsum Plaster

Rajhans Plast is a premium Quality Plaster product from Raj Plasters. Apart from its many outstanding features, it offers excellent resistance against earthquakes due to the lightweight, fiber-reinforced gypsum we use. Our quality product ensures that there's no dead load on your structure, keeping it strong, enduring and long lasting. Its package is specially designed so that the plaster does not come into contact with water.

Rajhans Plast Qualities

- **Eco-friendly:** Rajhans Plast is made entirely from natural materials, which makes this a very eco-friendly product. We do our bit for the planet.
- **Most Efficient:** Our unique formula, combined with the latest Nano insulating technology makes this revolutionary product extremely durable and efficient.
- **Elegant and Enduring Results:** Rajhans Plast creates an elegant, smooth façade that stays put no matter how bad the weather gets. The plaster does not allow any impurities to set in, resulting in an enduring façade that will last several lifetimes.
- **Direct Application:** Rajhans Plast's excellent adhesive and bonding properties ensure that bricks, block or concrete walls can be covered with a single coat. The result is a smooth, tight and water-resistant finish.
- **Highly Tenacious:** Once the Rajhans gypsum plaster is dry, it is impervious to cracks and de-bonding, irrespective of any pressure or thermal movements. Also, it won't shrink as it dries, so there's no fear of shrinkage cracks.
- **Light Weight:** Rajhans Plast is lightweight and has low density. This ensures that dead weight is not added to your structure.
- **Fire Protection:** Rajhans Plast is extremely non-combustible; our product actually acts as a fire barrier, keeping inner structures safe. We have tested our product for fire safety in accordance with IS 476: Part 4: 1970.
- **Low Thermal Conductivity:** Rajhans Plast contains gypsum, whose inherent nature helps in energy conservation. Plus, our product contains special additives, which keep the heat out when used externally. In cold regions, the same principle applies to keep the heat in when applied internally.
- **Excellent Soundproofing:** Gypsum's inherent ability to absorb airborne sounds makes it a leading material in soundproofing. A single coat of Rajhans Plast brings you blissful peace from outside noises.
- **Anti-fungal Properties:** Rajhans Plast, once dry, is absolutely pore-less and moisture-free. It does not encourage the growth of mold or fungus in any way. Our Rajhans Plast surfaces are so tough that even termites cannot make holes in them.

Products/Parameters	Rajhans-Stucco	Rajhans Excel	Rajhans Excel Pro
Finishing color	Brownish off-White	Off-White	Super-White
Dry Bulk Density (kg/m ³)	700	650	600
